

Ellman

The Future of Radiosurgery

The patented range of units from **Ellman** represent advanced radiowave technology which provides unparalleled surgical control, precision, versatility and safety. Clinical benefits include reduced post-operative discomfort, minimal scar tissue formation, maximum readability of histologic specimen, enhanced healing and excellent cosmetic results. Ellman's technology has received worldwide acclaim and recognition from leading surgeons, clinics, universities and authors. With three units available, all clinical applications and site considerations are catered for.

Item Number	Description
ELLMAN-045	Surgitron IEC Dual Frequency 4.0 MHz™ Radiofrequency device. 220V base unit complete with: Double Foot Pedal, Three button fingerswitch handpiece, Foot Pedal activated handpiece, 7 x Assorted electrodes, Bipolar Cable, Reusable neutral plate, 25 x Disposable neutral plates
ELLMAN-046	EMC Surgitron Radiofrequency device. 220V base unit complete with: Single pedal footswitch, Foot Pedal activated handpiece, 7 x Assorted electrodes, reusable neutral plate
ELLMAN-825	Radiolase II™ Patented monopolar and bipolar high frequency/low temperature energy source. 220V base unit complete with: Single pedal footswitch, Single-button fingerswitch handpiece, Foot Pedal activated handpiece, 7 x Assorted Electrodes, Reusable neutral plate

Output Modes For Surgitron IEC

Mode	Output Waveform	Output Frequency	Maximum Output Power
Cut	90% Cut 10% Coag	4.0 MHz	120W
Cut/Coag	50% Cut 50% Coag	4.0 MHz	90W
Hemo	P10% Cut 90% Coag	4.0 MHz	60W
Fulgurate	Spark - Gap	4.0 MHz	45W
Bipolar	Same as Hemo	1.7 MHz	5120W
	SIZE: 9"W x 5"H x 13 1/4"D WEIGHT: 18 lbs.		

Ellman

Handpieces & Electrodes

Item Number	Description	Qty/Box
	Handpiece & Neutral Plate - For EMC/IEC Units	
On Application	XHP1 Foot control Handpiece	1
On Application	IEC-NP Autoclavable Neutral Plate	1
	Electrodes - For EMC/IEC Units	
On Application	TA3 3/8" Needle	2
On Application	TA8 Varytip Needle	2
On Application	TB1 1/4" Fine Round Loop	2
On Application	TB4 Regular Round Loop	2
On Application	Disposable A20 Needle Electrode	25
On Application	Disposable B1D Loop Electrode	25
On Application	Disposable D8D Ball Electrode	25

Full range of accessories is available on application

Ellman

Smoke Evacuation

Item Number	Description	Qty/Box
ELLMAN-841	VAPOR-VAC II Ellman Vapor-Vac Smoke Evacuator Systems. Inc. 25 Disposable SAF-T_Wand / Filter Sets	1
ELLMAN-851	Disposable SAF-T_Wand / Filter Sets	25

Kirwan Bipolar Accessories

Kirwan Surgical Products Inc. manufacture high quality Electrosurgical Instruments and accessories. Included in the range are Kirwan's NON-STICK instruments (which conduct heat and electricity much better than standard stainless steel) re-usable and disposable bi-polar cords, re-usable and disposable diathermy pencils and disposable forceps complete with cords.

Cat#	Description	Box
	Bi-polar Cords	
10-4000	Bipolar Cord – Disposable 12', Sterile, Green Box(10)	10
10-6000	Bipolar Cord – Reusable silicone 12', Sterile, Green	1
10-6500	Reusable Storz Millenium (B&L) Adaptor	Single

Cat#	Description	Box
	Disposable Nonstick 'Over Molded' Bipolar Forceps TPR* with cord	
14-3000	10.2cm Jewelers/Iris Non-stick Straight Forceps, 0.4mm tip	10
14-1080	10.2cm Jewelers/Iris Non-stick Straight Forceps, 0.4mm tip, Curved	10
14-1090	10.2cm Coaptation Non-stick Straight Forceps, 0.4mm tip	10
14-3000	10.2cm Jewelers Str., 0.4mm tip, non-stick	10

Cat#	Description	Box
	Disposable Bipolar Pencils TPR* with cord	
14-5000	18GA Non stick pencil, Straight,	10
14-5002	18GA Non stick pencil, Straight, Curved	10
14-5006	20GA Pencil, Straight, Tapered tip, Sharp	10
14-5009	20GA Pencil, Straight, Tapered tip, Blunt	10
14-5011	25GA Pencil, Straight	10
14-5301	20GA Combined Pencil/Backflush - Passive with Reflux	10
14-5302	20GA Combined Pencil/Backflush - Active with Reflux,	10

*Thermo Plastic Rubber

Cat#	Description	Box
	Reusable Bipolar Pencils	
14-7000	18GA Non stick pencil, Straight,	1
14-7002	As above, Curved,	1
14-7008	20GA Pencil, Straight, Tapered tip, Sharp,	1
14-7009	As above, Sharp,	1

Cat#	Description	Box
	Disposable 'Liberty' Range of Disposable Forceps with Cord	
19-1275	3" Iris Bipolar Forceps, 0.4mm tip with 12'cord	10
19-1280	As above, curved	10
19-1290	4" Coaptation Forceps, 0.5mm tip with 12'cord	10
19-1295	4" Coaptation Forceps, x-fine, 0.4mm tip with 12'cord	10
19-3002	4" Jewelers Bipolar Forceps, 0.4mm tip with 12' Cord	10
19-3010	5" Jewelers Bipolar Forceps, 0.5mm tip with 12' Cord	10

Bipolar Coagulator

After years of research and development, **Kirwan** Surgical Products have introduced their new, progressive, AURA™Plus 70-watt Bipolar Irrigating Electrosurgical Generator. One key feature is the LCD touch screen which can be intensified or reduced for optimal viewing. The touch-pad controls complement the unit allowing the user to easily adjust settings. The output level is displayed in both watts and Malis™ units with power settings ranging from 0-70 watts. The footswitch is capable of controlling power only, irrigation only, or both power and irrigation. This unit also has a peristaltic irrigation pump with an adjustable flow rate ranging from 0 – 50 CCs per minute, and the stand is conveniently located on the back of the unit for holding the irrigation bag. The streamlined look of this generator truly puts it in a class of its own.

Item Number	Description
28-2600	Aura Plus 70-Watt Bipolar Irrigating Coagulator with Footswitch

MedDev Eyelid Closure Products

MedDev Eyelid Closure Products are designed for gravity-assisted treatment of the functional defects of lagophthalmos resulting from facial paralysis.

The Contour Eyelid Implant thickness is 1.0 mm. Contour Eyelid Implants feature a proprietary three-dimensional design that conforms to the curvature of the globe. Contour design implants are available for immediate delivery in either 99.99% pure gold.

The ThinProfile Eyelid Implant thickness is 0.6 mm. ThinProfile Eyelid Implants are 40% thinner than MedDev Contour Eyelid Implants to optimise eyelid cosmesis. ThinProfile design implants are available for immediate delivery in either 99.99% pure gold.

- Thinnest Available Implant
- Proven Functional Results
- Superior Cosmesis
- Enhanced Patient Satisfaction

Custom Implants are readily produced in non-standard weight or design upon request. Platinum implants available by special order.

MEDDEV-670	Tantalum Weight Sizing Set- Including 100 EyeClose Strips and a skin Tone Selector Card	N/A

Larger sizes available on request.

Network Medical

DCR & Lacrimal Intubation Products

Superior products with an extensive range, Network offer innovations such as 'crimped' contact between probe and silicone tubing on their Crawford set to ensure integrity of the tubing. This ensures a much reduced chance of the tubing coming off the probe at critical times.

DFV Code	Description	Rebate Code
NW-100	51-918 Crawford Type Intubation Set. Sterile, Box/1. Probe length: 15cm, Silicone tube: 32cm	DV021
NW-102	51-919 Crawford Retrieval Device – reusable Sterile, Box/1.	NA
NW-104	51-922 Canaliculus Intubation Set. Sterile, Box/1. Probe length: 15cm, Silicone tube: 30cm	DV023
NW-106	51-922 DCR Bodkin Straight. Sterile, Box/3. Bodkin length: 4.5cm/20-g, Silicone tube: 40cm	DV021
NW-108	51-923 DCR Bodkin Angled. Sterile, Box/3. Bodkin length: 4.5cm/20-g, Silicone tube: 40cm	DV021

Dry Eye Products

PUNCTUM PLUGS - SUPER EAGLE™

The most advanced silicone punctum plug available!

Lowest profile rim and soft, low durometer silicone mean Super patient comfort. Patented Tapered Shaft™ and pivoting wide-flex nose mean Super retention. Available in three sizes.

SYNTHETIC DISSOLVABLE PLUGS DURAPLUG™

Synthetic Extended Temporary Punctal/Canalicular Insert

Effective 60 - 180 days. Made of PCL, these are ideal for:

- treatment of post lasik induced dry eye
- treatment of seasonal dry eye
- retention of ocular medication

TEMPORARY COLLAGEN INSERTS

EagleVision dissolvable punctal/canalicular collagen inserts can be used as a cost-effective way to evaluate the benefits of permanent punctal occlusion. The collagen inserts are effective for 3-5 days and dissolve in approximately 7-10 days.

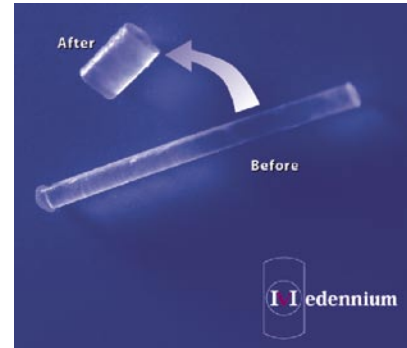

Code	Dry Eye Range	Qty/Box
3130	Super Eagle on inserter - Small	1
3131	Super Eagle on inserter - Medium	1
3132	Super Eagle on inserter - Large	1

0052	Temp Collagen Shorts 0.2mm	(box 60)
0053	Temp Collagen Shorts 0.3mm	(box 60)
0054	Temp Collagen Shorts 0.4mm	(box 60)
0057	Variety Pack Collagen Implant	(box 60)

Medennium

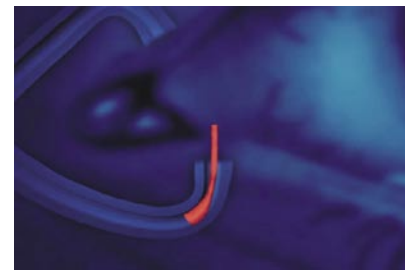

SmartPLUG™

The **SmartPLUG** from Medennium utilises a thermodynamic acrylic “smart” polymer that is a rigid solid at or below 32°C. Above 33°C the SmartPLUG becomes soft and flexible designed to conform to patient’s punctum shape and size. Inserted easily using the slit lamp with dedicated forceps the SmartPLUG has many advantages over tradition punctal products:

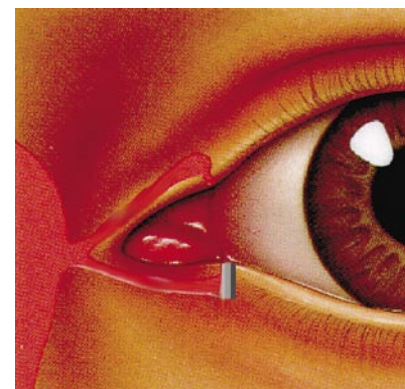

- New 6mm length for easier insertion
- No sizing needed
- No dilation needed
- No inserter needed
- One size fits a range of puncta
- Low inventory
- Cannot be rubbed out
- Long term fixation
- No exposed plug heads, completely contained within the vertical punctum
- No foreign body sensation

SmartPLUG™ Changing Shape at Body Temperature

Final Position of the SmartPLUG™

Code	Dry Eye Range	Qty
500	SmartPlug	Pack of Two
505	SmartPlug - 5 pack configuration	5 x Pack of Two
