Sterilisation

The Nova Class 'B' Autoclave

Fully automatic high speed Pre and Post high vacuum autoclave.

The NOVA steriliser is a high speed, high vacuum, high capacity, Class B steriliser designed to cover a large field of applications for the medical field, as well as private clinics and dental offices. The NOVA autoclave serves the requirements for outstanding performance along with compact dimension and impressive design. This tabletop autoclave is designed for sterilisation of medical and surgical materials such as packed & wrapped solids, instruments and narrow lumen.

Item Number	Description
TUTT-059	Tuttnauer "NOVA" Fully Automatic High Speed Pre & Post High Vacuum Autoclave

“Hotspots” Autoclave Pouches

1. Internal & External Indicators

Demonstrates steam has not only reached outside but also the inner chamber of pouch.

2. 10mm seal

Higher paper/plastic content ensures an extra strong seal.

3. Medical Grade Paper

High quality non-lining paper will not clog drainage outlets in the autoclave.

4. Blue Tinted Film

Allows quick identification of incomplete seal

5. Perforated Fold

Allows accurate air-tight seal

6. Thumb Notch

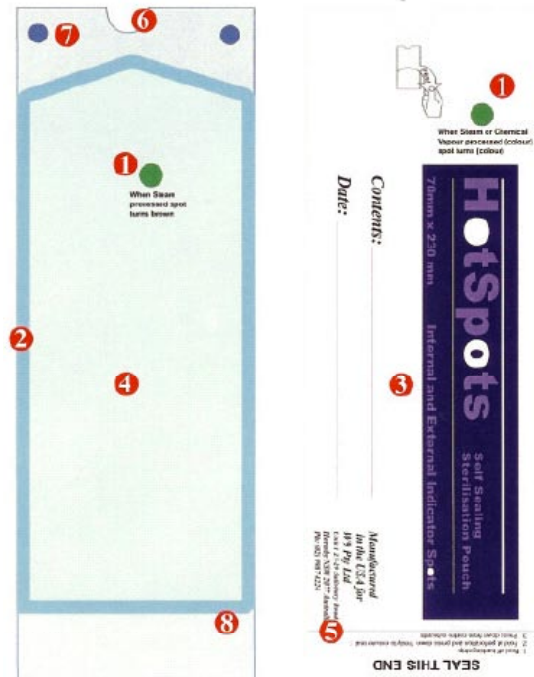

Assures ease of opening.

7. Corner Tack Seals

Prevents curling and collection of dust after processing.

8. Complete Film Paper Separation

Maintains the integrity of the contents until their use ie. No outside contaminants on opening.
